A Message from Mr. Escheman

We have been honored as a 2018 California Distinguished School. We are the only elementary school in Yuba County receiving that award. The individuals that need to be recognized is our learners. Let me give you a little data about these learners. Close to eighty percent were at the poverty level last year. Twenty percent do not have English as the primary language at home. And yet, these children scored higher than the rich in Granite Bay. They scored higher than any other second language school around us. We even beat English only schools with our Limited English students. The bottom line of who succeeds is children with grit which means children that have gone through adversity and fought back. Last year, I made this comment several times during testing. I don't know how they are going to do but the one thing I do know, I have never seen learners work and try any harder. Without a doubt, we have all become broken records that constantly repeat, you have to work harder. Don't give up. School is hard. You need to think. You can do it. It is the learners that do it but it is all of us that prepare them to do their thing. It is now less than a month till testing and we are truly going to make all these learners believe that they are the greatest in the world and they will demonstrate their greatness by their grit.
